
Training: human-written corpus
Public corpus
17,537 emails
Kaggle / Enron
Split and features
80/10/10, seed 42
six features
Train detectors
7 variants x 5 seeds
+ TF-IDF baseline
Evaluation only: LLM-written matched pairs
LLM generation
3 models, 10 lures
temperature 0.8
Quality checks
refusals, length
every attempt logged
Matched-pair set
P, B_{hard}, B_{easy}
+ 96 rewrites
Score and test
1,754 + 1,446 emails
per-email probabilities
AUC, FPR, McNemar,
bootstrap, Holm
